FALL PROTECTION

1. All personnel working in the perms outside the catwalks who are exposed to a fall hazard must use fall protection that meets Cal/OSHA requirements (Title 8).

2. Warner Bros. requires fall protection where there is a fall hazard of 6 feet or more.

3. All full-body harnesses, lanyards, connectors and anchorage components shall be labeled as meeting the current ANSI/ASSP Z359 series (or another standard accepted by Cal/OSHA); ANSI A10.14-1975 has been superseded. Body belts shall not be used for fall arrest.

4. All personnel utilizing fall protection equipment shall have received training prior to starting work. Training must cover fall hazards, inspection and proper use of equipment, rescue procedures, and must be documented.

5. All fall protection equipment must be visually inspected prior to use.

6. All retractable lines must be inspected at least twice a year (or more often if the manufacturer requires) by the manufacturer or an authorized service provider.

7. Any equipment which malfunctions or is involved in a fall must be taken out of service immediately and sent to Warner Bros. Safety & Environmental Affairs.

8. Where practicable, the anchor end of the retractable line shall be secured at a level not lower than the employee's waist, unless otherwise designed and installed per manufacturer specifications.

9. Cross-arm straps for attachment of retractable lanyard units shall only be placed in areas previously identified by a Registered Professional Engineer.

10. Avoid electrical hazards due to the possibility of current flowing through the wire rope lifeline.

11. Anchorages used for personal fall arrest must be capable of supporting at least 5,000 pounds per employee attached (or be designed by a qualified person with a safety factor of at least two), and personal fall arrest systems must limit free fall to 6 feet or less.

12. A plan for prompt rescue of an employee who has fallen must be in place before work begins; no employee may be left suspended in a harness without a means of rescue.
